

NEP ORSHISO | Software Engineer

Atlanta, GA

[Personal Website](#) | [Github](#) | [LinkedIn](#) | nep.orshiso@gmail.com

I'm an entrepreneurial software engineer with the ability to work well in teams. Before, I managed a team of retirement representatives in a financial services call center. Now, I develop in the PERN Stack (PostgreSQL, Express, React, Node.js) and am searching for a software engineering opportunity.

Software Development Skills

- React, JavaScript, Python, SQL, Node.js, Express, PostgreSQL, AWS, Git, Redux, RESTful API, HTML5, CSS3, jQuery

Certificate

- AWS Certified Cloud Practitioner | Acquired Nov 2019

Education

Certificate in Software Engineering | DigitalCrafts | Atlanta, GA Aug 2019 – Dec 2019

- Software engineering training program covering full-stack development including, but not limited to JavaScript, Python, including an emphasis on modern frameworks like React/Redux and back-end technologies including Node.js, Express, and PostgreSQL

B.S. in Finance & Marketing | Truman State University | Kirksville, MO Aug 2011 – Dec 2014

Software Development Portfolio

CodeTrain | <https://git.io/JedGQ> Dec 2019

- A platform for coding bootcamp students to share learning resources and prospective employers to post their job listings and connect with students
- Features include: 3 unique user roles, account creation, login authentication, CRUD operations for resource and job posts, job applications and status updates, user messaging and reporting
- Built with PostgreSQL, Express, React, Redux, Node.js

Initial Calculus Essentials | ice.neporshiso.com | <https://git.io/JegLd> Oct 2019

- Member of a 3-person development team to create software for anyone learning calculus for the first time that allows users to keep track of their performance
- Responsibilities included writing SQL queries to retrieve and manipulate data from multiple tables for rendering in the ES6 Template Engine
- Built with PostgreSQL, Node.js, Express, jQuery, HTML, CSS

MoonSet | <https://git.io/Jegtt> Sep 2019

- Led development efforts of a 3-person team building a classic "shoot -em up" style game where two players try to survive a swarm of enemy ships and defeat an enemy boss using the Pygame library
- Responsibilities included creating enemy ship sprites that can regenerate and shoot back at the player as well as designing screens such as the Game Over and Start Menus

Work Experience

Empower Retirement | Junior Manager | Overland Park, KS Jan 2017 – Jul 2019

- Implemented a project to identify knowledge gaps and increase efficiency by directing team leads to log and categorize questions asked by reps, analyzed the data provided, and presented findings to management, in order to develop customized coaching opportunities
- Created excel pivot tables to track and monitor representatives' call metrics month over month and decreased call handling time by 15.5%
- Completed 38 call reviews monthly to ensure interactions with retirement plan participants are compliant with FINRA regulations and internal quality procedures

Motavera, Inc. | CEO, Co-Founder | Kansas City, MO Jan 2015 - Jan 2017

- Secured \$20,000 in funding from Digital Sandbox KC which is a local organization created by the U.S. Commerce Department's Economic Development Agency
- Led Motavera Sales Process that used Insightly CRM to organize prospecting, qualifying leads, and engaging leads with a product demo conducted over the web. Actively engaged in this process and handled product demos with leads.
- Drove marketing activities on campus to attract students by presenting to various student organizations
